

PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate with a strong foundation in programming, database management, and web technologies. Completed academic projects including a Fake News Detection system and a Blood Donor Finder application, demonstrating practical problem-solving and software development skills. A quick learner with a passion for building real-world applications, seeking an entry-level software development role where I can contribute, grow, and continuously enhance my technical expertise.

EDUCATION

Don Bosco Degree College	2023 - 2026
<i>Davanegere University</i>	<i>CGPA, 8.0</i>
Department of Pre-University Education (DPUE)	2021 - 2023
<i>Pre-University Course (PUC)</i>	<i>percentage, 57</i>
Karnataka Secondary Education Examination Board (KSEEB)	2020 - 2021
<i>SSLC</i>	<i>percentage, 93.28</i>

TECHNICAL SKILLS

Languages: Python, C,C++,Java

Web Technologies: HTML,CSS,JavaScript

Databases: MySQL, DBMS

Operating System: Windows

Tools: MS Office, VS Code

ACHIEVEMENTS/ CERTIFICATE

- National Cyber Crime Training Center (2025)
- My Bharath Budget quest (2026)
- Viksit Bharath Young Leaders Dialogue (VBYLD 2026)
- Cloud Computing Course(2025)
- Cyber security Essential Course(2025)
- 2nd place in Throw Ball in College
- 2nd place in Paper Presentation in College
- Co-Ordinator in Technostav

PROJECTS

Blood Donor Finder	HTML,CSS,JavaScript and MySQL
• Developed an interactive web application that connects blood donors with patients in real-time. • Features search filters by location and blood group, secure donor registration, and instant notification capabilities to streamline critical blood donation requests during emergencies.	
Fake News Detection Using AI	Python, HTML, CSS
• Developed a Streamlit-based analytics dashboard using Gradient Boosting to predict telecom customer churn across 7,000+ customer records. • Developed an AI-powered Fake News Detection system that analyzes news articles using Machine Learning and Natural Language Processing techniques to classify news as real or fake. The project focuses on improving information reliability by identifying misleading content with high accuracy.
